Certification Criteria

CompTIA reviews developments in the IT
certification landscape and adjusts the IT
Certifications Roadmap as necessary.

To be included in the IT Certifications Roadmap,
a certification must meet at least 60% (3 out of
5) of the following criteria.

- **Acceptable Development Standards:**
Developed based on processes established by
a standards body. (For example: ISO/ANSI.)
- **Training Industry Recognition:** Third-party
training products are available to prepare
individuals for the certification. (For example:
books, ebooks, videos, bootcamps, practice
tests)
- **IT Industry Recognition – Media:** Cited in
industry publications either online or in print.
(For example: SC Magazine, PC World, and
surveys from respected journals)
- **IT Industry Recognition – Authority:** Cited by
Subject Matter Experts in the IT industry.
(For example: SMEs that work regularly with
CompTIA, recognition from other certification
bodies)
- **Employer Recognition:** Cited in jobs ads and
postings for positions in targeted job roles.
Data should be available from an objective,
third party organization (e.g., Burning Glass
or Indeed.com).
